

In this dropbox folder are plans, photos and other documents for the application listed in the file directory. Please note that the items in this file may change and additional items, such as Public comments and a Staff report, may be added prior to a hearing. The reason for such changes, prior to a hearing, is that the Planning and Zoning Office will review and provide comments on the application to the Applicant. The Applicant will often revise their application due to these comments. Revised submittals will replace the original submittals. The final review, or Staff report, is usually provided to the dropbox on the Thursday or Friday prior to the DRB hearing.

This document is removed from the folder when the application is finalized and a staff report is provided.
