Hello Mitch,

I would like to submit this request as an adjacent land owner and as President of the Creekside Association.

We request that the developer amend the Creekside/Town of Hinesburg waste water permit, at their expense, to account for the additional flows into the detention pond. We would like to see this done before any discharge into the pond.

We would also like in writing from the developer that they will build the new road north of the Creekside development first and have all construction traffic use that road. We have way too many small kids in the neighborhood to have a bunch of big trucks and equipment coming through on a regular basis.

I have mentioned these items at previous meetings but have not seen any assurances in writing from the developer.

Please let me know you have received this and that it will be part of the record.

Thank you for your help with this,

Dan Jacobs
